

2021 SCIENCE + NATURE SUMMER CAMP DESCRIPTIONS

JUNE 28-JULY 2: WILDERNESS ADVENTURE

What does it take to succeed in a wilderness situation? Campers will practice outdoor adventure skills like map reading, animal tracking, basic outdoor safety, and weather prediction.

JULY 6-9*: TREASURE HUNTERS *(NO CAMP ON 7/5)

Let's go on a treasure hunt! Campers hone their detective skills to discover hidden treasures. Scavenger hunts, puzzles, and mystery abound as they explore the forests and fields.

JULY 12-17: DIGGING FOR DINOS

Got a dinosaur lover? This week is for them! Dig for a dinosaur skeleton in our paleontology pit, learn about prehistoric animals that lived in New York, and play dinosaur games.

JULY 17-23: LITTLE SCIENTISTS

Time to experiment! Campers test physics, chemistry, engineering, and biology through hands-on experiments. They'll make hypotheses and discover science in action in the natural world.

JULY 26-30: PLANET PROTECTORS

Planet Protectors help the Earth! Campers will learn about ways they can help our local wildlife, water sources, and natural areas.

AUGUST 2-6: NATURE AND THE ARTS

Art and nature go hand in hand, but art is more than painting. Explore theatrics, song and dance, sculpture, and more in this week focused on creativity and expression.

AUGUST 9-13: WILDLIFE WEEK

Animal lovers unite! Campers will learn about our local ecosystems, who lives in them, and meet some of the animals that live at the Wildlife Education Center.

AUGUST 16-20: BUG BONANZA

Anything with less than six legs need not apply. Campers spend the week exploring different insects -- whether they fly, crawl, or swim!
